Professional Summary

Motivated MERN Stack Developer with 2+ years of self-learning experience building responsive and scalable full-stack web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Passionate about developing clean, user-friendly applications with secure authentication, REST APIs, and modern UI/UX. Continuously learning new technologies and building real-world projects to strengthen problem-solving and software development skills.

Technical Skills

Programming: JavaScript

Frontend: React.js, HTML5, CSS3, Bootstrap, Material UI

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code

Other: REST APIs, JWT Authentication, MVC Architecture, Role-Based Access Control (RBAC), Firebase Authentication, Nodemailer

Projects

Online Exam System (Full Stack)

React.js, Node.js, Express.js, MySQL, JWT Authentication, REST APIs

- Developed a full-stack online examination platform with separate Admin and Student portals.
- Implemented secure JWT authentication and role-based authorization.
- Built complete CRUD modules for Subjects, Quizzes, Questions, Student Enrollment, and Study Notes.
- Developed custom quiz generation, timer-based exams, leaderboard, quiz analytics, and performance tracking.
- Designed relational MySQL database and RESTful APIs following MVC architecture.
- Built responsive dashboards providing real-time statistics and user management.

Daraz Clone – E-Commerce Application

MongoDB, Express.js, React.js, Node.js, Firebase Authentication, JWT

- Developed a complete MERN-based eCommerce platform inspired by Daraz.
- Implemented authentication using Firebase along with JWT-based authorization.
- Built Admin Dashboard for managing products, categories, users, and orders.
- Implemented shopping cart, product search, filtering, checkout, and order management.
- Added password recovery functionality using Nodemailer.
- Designed responsive user interface using React.js and Material UI.

Blood Bank Management System

MongoDB, Express.js, React.js, Node.js, JWT

- Developed a MERN-based Blood Bank Management System with Admin and Donor modules.
- Implemented secure JWT authentication and protected routes.
- Built blood inventory management and donor registration system.
- Developed CRUD operations for donor management and blood stock records.
- Created responsive dashboard for monitoring blood availability and donations.

Education

BS Computer Science

2020 – 2023

University of Sindh, Jamshoro, Pakistan

Certifications

- MERN Stack Training – Hazza Institute of Technology
- ICT & IEEE Mini Project – University of Sindh
