Portfolio

Professional Summary

Backend Node.js Developer with hands-on experience building scalable applications using Node.js, Express.js, MongoDB, MySQL, REST APIs, JWT authentication, and MVC architecture. Experienced in AI-powered applications and event-driven microservices using NATS and JetStream. Strong understanding of backend architecture, database design, authentication, and asynchronous communication.

Technical Skills

- **Languages:** JavaScript (ES6), SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, REST APIs, Microservices, Express Middleware
- **Databases:** MongoDB, MySQL
- **Auth & Messaging:** JWT, RBAC, Firebase Authentication, NATS, JetStream, Event-Driven Architecture
- **Tools:** Git, GitHub, Postman, VS Code, Cursor AI

Technical Projects

AI Resume Analyzer & Interview Coach

GitHub

Node.js—Express.js—MongoDB—React.js—JWT—AI • 21 API Routes—4 MongoDB Models—12 Pages

- Built an AI-powered platform that analyzes resumes, identifies strengths and weaknesses, and provides personalized career feedback.
- Developed secure Node.js/Express APIs for authentication, resume processing, AI integration, and AI-powered interview preparation.
- Implemented resume parsing and structured data processing to extract relevant candidate information and generate targeted AI-based recommendations.

Microservices Notification System

GitHub

Node.js—Express.js—MongoDB—NATS—Jetstream—JWT • 2 Microservices—Event-Driven—No Direct REST

- Designed an event-driven microservices system with independent User and Notification services communicating asynchronously through NATS.
- Implemented NATS JetStream for reliable event publishing and consumption, along with JWT authentication and environment-based configuration.
- Designed services with independent responsibilities and asynchronous workflows, avoiding direct REST communication between microservices.

Online Learning Platform (MedMinds)

GitHub

Node.js—Express.js—MySQL—React.js—JWT • 15 Database Tables—2 User Roles—Admin & Student Portals

- Developed a full-stack learning platform with Admin and Student portals, quizzes, custom tests, enrollments, progress tracking, and performance analytics.
- Designed a normalized MySQL database and implemented JWT authentication, RBAC, REST APIs, and MVC-based backend architecture.
- Built modules for quiz attempts, custom tests, enrollment management, and role-based admin operations.

E-Commerce Web Application (Daraz Clone)

GitHub

Node.js — Express.js — MongoDB — React.js — JWT — Cloudinary

- Built a MERN e-commerce platform with product management, shopping cart, search, filtering, wishlist, checkout, and order management.
- Implemented JWT/Firebase authentication, Cloudinary image storage, and an Admin Dashboard for managing products, users, and orders.

Education

BS Computer Science

2020 – 2023

Certifications

- **MERN Stack Development** – Hazza Institute of Technology
- **ICT & IEEE Mini Project** – University of Sindh
